

PRODUCT SPECIFICATION SHEET

Product: Nordkern Thermal Wall Panel NK-TWP 120

Document No.: SPEC-NK-TWP-120-01 **Revision:** A

Product overview

A fictional insulated wall panel designed for thermal insulation applications in residential and commercial building envelopes.

Technical specifications

Property	Specification
Product type	Insulated wall panel
Nominal thickness	120 mm
Panel length	2400 mm
Panel width	600 mm
Core material	Mineral wool
Core density	110 kg/m³
Thermal conductivity λ_D	0.022 W/(m·K)
Fire classification	B-s1,d0
Compressive strength	150 kPa
Water absorption	≤ 1.0 %
Service temperature	-40 °C to +80 °C
Approx. panel mass	8.5 kg/m²

Handling and storage

Store panels flat, dry, and protected from prolonged exposure to weather. Avoid impact and deformation during transport.
